GASOLINE STATION Request for Registration Exemption

Registration and vapor control requirements for gasoline stations are determined by a facility's annual throughput. We are, therefore, requesting gasoline throughput information so that we may determine your facility's regulatory status in accordance with Northwest Clean Air Agency (NWCAA) section 320.5.1(dd), 580.1 and 580.6. These regulations are available for review on the internet (<http://www.nwcleanair.org>).

Please return this form to the NWCAA no later than January 31. **Throughput information will be kept confidential.** If you have any questions regarding this request, please contact Julie O'Shaughnessy at extension 210.

<i>Please type or print clearly.</i>	

- A **gasoline station's** throughput from the previous calendar year determines exemption status. For a station to be exempt from registration, gasoline throughput must be less than 200,000 gallons per year.
- It will be assumed that facilities that do not submit this registration exemption form are operating over 200,000 gallons per year threshold. These facilities will be registered with the Northwest Clean Air Agency and billed \$190.00 annual registration fee.

Please provide annual gasoline throughput information (gallons) for the

2009 Calendar Year:

I hereby certify that the above information is accurate and complete.
